

Chapter 12: The World System, Colonialism, and Inequality

Across

3. An ideological justification for outsiders to guide native peoples in specific directions
7. A single world system committed to production for sale or exchange, with the object of maximizing profits rather than supplying domestic needs
8. The current form of the classic economic liberalism laid out in Adam Smith's famous capitalist manifesto
9. The study of interactions between European nations and the societies the colonized
11. The dominant position, includes the strongest, most powerful, and technically most advanced industrial nations

13. A policy extending the rule of a country or an empire over foreign nations and of taking and holding foreign colonies

14. Wealth or resources invested in business, with the intent of generating further wealth

15. A political movement and doctrine seeking to overthrow capitalism and establish a system that prevailed in the Soviet Union

16. Includes the world's least privileged and powerful countries

Down

1. Describes a social system in which property is owned by the community and in which people work for the common good

2. The historical transformation of "traditional" into "modern" societies through Industrialization

4. The political, social, economic, and cultural domination of territory and its people by a foreign power for an extended time

5. The intermediate between the core and the periphery; contemporary nations that are industrialized

6. An identifiable social system, featuring wealth and powerful differentials, extends beyond individual countries.

10. The dominant position, includes the strongest, most powerful, and technically most advanced industrial nations

12. Had to sell their labor to survive
