# Chapter 21

## Across

1. Elevations of plasma lipid concentration
3. Inflammation of lower esophagus from regurgitation of acid gastric contents
6. Drugs that block the passage of impulses through the parasympathetic nerves
10. Localized collection of blood in the tissue resulting from a break in the wall of the blood vessel
11. Drugs that relieve pain without causing a loss of consciousness
19. Not through the gastrointestinal tract but by injection
21. Process of clot formation
22. Persistently high arterial blood pressure, usually more than 140mm Hg systolic & 90mm Hg diastolic
24. Chemical structure but is not protected as is a brand or trade name
26. Any substance that when taken into a living organism may modify one or more of its functions

27. Condition in which thickening of the wall of a blood vessel occurs because of the deposition of plaque
28. Breathable chemical vapor that may cause systemic & local effects
30. Weakening of the bones
31. Response to a drug that is not normative per its intended action or side effects
32. Disorder of the peripheral nervous system, a complication of diabetes

## Down

2. Presence of abnormally large amounts of fluid in the tissues of the body
4. Agents that reversibly depress neuronal function
5. Condition of shock caused by hypersensitivity to a drug or other substance that results in life threatening respiratory distress & vascular collapse
7. Form of nerve damage that affects the stomach
8. Degenerative neurologic disease of the brain that often impairs motor skills
9. Severe constricting pain in the chest caused by ischemia of the heart muscle.

12. Conditions that render the administration of some drug or some particular line of treatment improper or undesirable
13. Diffusion of fluid into a tissue
14. Primarily a disorder of carbohydrate, protein, & fat metabolism secondary to insufficient secretion of insulin
15. Microscopic organisms such as bacteria or viruses
16. Variations from the normal rhythm of the heartbeat
17. Substance that tends to nullify the action of another drug
18. Drugs that cause expansion of the lumina of the air passages of the lungs
20. Agents that promote evacuation of the bowel
23. Drugs that promote the excretion of urine
25. Drugs, natural or synthetic
29. Subnormal concentration of erythrocytes or hemoglobin in the blood
