

Chapter 21: Pharmacology Pt 1.

Across

1. bone mineral density is decreased
2. agents that reversibly depress neuronal function, producing loss of ability to perceive pain or other sensations
6. disease of the brain that impairs motor skills, speech,
7. elevations of plasma lipid concentration
8. drugs that promote the excretion of urine
16. breathable chemical vapor that may cause systemic and local effects
22. any substance that when taken may modify one or more of its function
23. substance that tends to nullify the action of another drug
24. presence of abnormally large amounts of fluid in the tissues of the body
25. condition of shock caused by hypersensitivity to a drug or other substance that results in life threatening respiratory distress and vascular collapse
26. not through GI but by injection
27. conditions that render the administration of some drug or some particular line of treatment improper or desirable

Word Bank

bronchodilators
inhalant
laxative
anaphylaxis
parenteral
angina pectoris
parkinson disease

antagonist
idiosyncratic reaction
hematoma
diabetes mellitus
diabetic gastroparesis
diuretics
atherosclerosis

GERD
anticholinergics
coagulation
generic name
arrhythmias
contraindications
anesthetics

28. drugs that cause expansion of the lumina of the air passages of lungs
 29. drugs that have pain relief, example is morphine
 30. high arterial blood pressure
 31. drug that relieves pain without causing a loss of consciousness
 32. blood in the tissue resulting from a break in the wall of blood vessel
 33. person licensed to prepare and dispense drugs
- Down**
3. subnormal concentration of erythrocytes or hemoglobin in the blood
 4. disorder of the peripheral nervous system
 5. form of nerve damage that affects the stomach
 9. clot formation
 10. severe constricting pain in the chest, often radiating to the shoulder and down arm caused by ischemia
 11. response to a drug that is not normative per its intended action or side effects
 12. drugs that block the passage of impulses through the parasympathetic nerves

13. disorder of carbohydrates, protein, and fat metabolism, secondary to insufficient secretion of insulin or insulin resistance
14. microscopic organisms such as bacteria
15. condition in which thickening of the wall of a blood vessel occurs because of the deposition of plaque
17. variation from the normal rhythm of the heartbeat
18. diffusion of fluid into tissue
19. agents that promote evacuation of the bowel
20. drug name descriptive of its chemical structure
21. inflammation of the lower esophagus from regurgitation of acid gastric contents
