

Name: _____

Date: _____

Chapter 2

Across

3. What forms when monomers join together?
 4. What are positively and negatively charged compounds?
 6. What is table salt?
 10. What are the smaller units of macromolecules called?
 14. What is water?
 15. A substance formed by the chem. Comb. Of two or more elements in definite proportions?
 16. What is the attraction between molecules of diff. Substances?
 17. What are dissolved compounds?

19. What are macromolecules containing hydrogen?

21. What are mixtures of water and non dissolved material?

Down

1. What is a neg. Chrged particle?
 2. What is a material compound of two or more elements?
 5. What is formed through the process known as polymerization
 7. What forms when electrons are shared between atoms?
 8. What scale indicates the concentration of H⁺ ions in solution?

9. What is the smallest unit of most compounds?

11. What is the attraction between molecules of the same substance?

12. What forms when one or more electrons are transferred from one atom to another?

13. What is made mostly from carbon and hydrogen atoms?

18. What is a compound that produces hydroxide ions in solution?

20. What is the basic unit of matter?
