Chapter 2 Vocab Part 2

Across

3. disease that occurs over a wide geographic area and affects a very high proportion of the population

5. the situation in which the number of people in a area exceeds the capacity of the environment to support life at a decent standard of living

6. the annual number of female deaths per 100,000 live births from any cause related to or aggravated by pregnancy or its management

7. the average number of years an individual can be expected to live, given current social, economic, and medical conditions. Life expectancy at birth is the average number of years a newborn infant can expect to live

8. medical technology invented in Europe and North America that has diffused to the poorer countries in Latin America, Asia, and Africa. Improved medical practices have eliminated many traditional causes of death in poorer countries and enabled more people to live longer and healthier lives

9. the number of males per 100 females in the population

10. a decline of the total fertility rate to the point where the natural increase rate equals zero

11. the percentage growth of a population in a year, computed as the crude birth rate minus the crude death rate

12. the average number of children a woman will have throughout her childbearing years

Down

1. the number of people per unit of arable land

2. a bar graph that represents the distribution of population by age and sex

4. the total number of deaths in a year among infants under 1 year of age for every 1000 live births in a society
