

Chapter 4 Animal Growth and Heredity

Across

2. The stages that a living thing passes through as it grows and changes.

5. A behavior that an organism inherits

7. A threadlike structure in the nucleus, made up of DNA.

8. All the living and nonliving things that surround and affect an organism

9. A trait that appears only if an organism has two factors for the trait.

10. A trait that appears even if an organism has two factors for the trait

Down

1. A behavior that an animal acquires through experience.

3. A characteristic passed from parents to offspring

4. The process by which most cells divide.

6. The part of the chromosome that contains the DNA code for an inherited trait.
