# Chapter 5 Infection Control

## Across

3. disease transmitted from person to person  
6. pimple or abscess  
10. type of bacteria that rarely shows motility  
12. applied to the skin to reduce microbes  
18. rod shaped bacteria  
20. licensing agencies, health departments and Boards of Cosmetology  
22. spiral shaped bacteria  
23. immunity that develops after overcoming a disease or through inoculations  
24. swelling, heat and pain  
26. head lice  
27. a safe and useful type of disinfectant (quats)

## 28. multi use item

## 29. a disease that causes liver damage

## Down

1. non-pathogenic bacteria  
2. objects used during an exposure incident should be discarded in a  
4. reaction to certain foods, chemicals or other normally harmless substances  
5. skin disease caused by the itch mite  
7. when bacteria and their toxins are carried to all parts of the body  
8. disease causing microorganisms carried in the body by blood or body fluids  
9. sodium hypochlorite  
11. HIV is the virus that causes  
13. common foot infection  
14. one-celled micro-organisms with both plant and animal characteristics

15. invasion of body tissues by disease-causing pathogenic bacteria  
16. removing all visible dirt and debris from tools, implements and equipment by washing with soap and water  
17. liquid contained in the cell wall of bacteria  
19. molds, mildews and yeasts  
21. chemical products that destroy all bacteria, fungi, and viruses (but not spores)  
25. parasitic submicroscopic particle that infects and resides in cells
