

# Chapter 5 Lesson 6 Erosion and Deposition

**Across**

- 1. What is the main force causing erosion?
- 8. How do rock particles get moved from place to place ?
- 9. What forms looping bends and can erode the sides of a valley and make it wider ?
- 10. What are large , loose deposits of sand ?
- 11. What is the movement of materials away from a place ?

**Down**

- 2. What is Water frozen that can cause erosion ?
- 3. What can rain cause in low , flat areas ?
- 4. What can blow topsoil off the fields ?
- 5. What is the major cause of erosion along coastlines?
- 6. What prevents some of the wind from blowing on the fields ?
- 7. What is the process of laying down materials , such as rocks and soil ?

**Word Bank**

- |            |                      |            |
|------------|----------------------|------------|
| Gravity    | Deposition           | Wind       |
| Waves      | wind , water and ice | Sand dunes |
| Tall trees | Erosion              | Flooding   |
| Rivers     | Glaciers             |            |
