# Chapter 5 part 1

## Across

1. Chemical germicides formulated for use on skin registered and regulated by the food and drug administration
4. number of viable organisms in or on an object or surface or the organic material on a surface or object before decontamination or sterilization
8. the ability to produce an effects
14. an abnormal condition of all or part of the body or its systems or organs that makes the body incapable of carrying on normal function
16. chemical products that destroy all bacteria, fungi, and viruses on surfaces
17. A disease that breaks down the body's immune system
19. Immunity that the body develops after overcoming a disease
20. division of bacteria cells into two new cells called daughter cells
21. one celled microorganisms that have both plant and animal characteristics some are harmful some are harmless

23. also known as communicable disease that is spread from one person to another person

24. chemical process that uses specific products to destroy harmful organism on environmental surfaces

25. the removal of blood or other potentially infectious materials on an items surface and the removal of visible debris or residue such as dust hair and skin

## Down

2. known as chelating detergents that breaks down stubborn films and remove the residue of pedicure products such as scrubs salt and mask
3. disease causing microorganism carried in the body by blood or body fluids, such as hepatitis and HIV
5. transmission of blood or body fluids through touching, kissing, coughing, sneezing, and talking
6. determination of the nature of a disease from its symptoms and/or diagnostic test

7. contact with nonintact skin, blood, body fluid or other potentially infectious materials that is the result of the performance of an employee's duties
9. the presence or the reasonably anticipated presence of blood or other potentially infectious materials on an items surface or visible debris or residue such as dust hair and skin
10. spherical bacteria that grow in pairs and cause diseases such as pneumonia
11. capable of destroying bacteria
12. showing no symptoms or signs of infection
13. short rod shaped bacteria they are the most common bacteria and produce diseases such as tetanus, typhoid fever tuberculosis and diphtheria
15. Reaction due to extreme sensitivity to certain foods, chemical or other normally harmless substances
18. round shape bacteria that appear singly or in groups
22. mechanical process using soap and water or detergent and water to remove all visible dirt debris and many disease causing germ
