

# Chapter 6: Attention and Memory

**Across**

- 2. \_\_\_\_\_ is the process of getting information into the memory system
- 6. \_\_\_\_\_ is the process by which information is held in working memory
- 7. Taking notes while listening to a lecture is an example of \_\_\_\_\_ attention
- 9. Speed of \_\_\_\_\_ is how quickly and efficiently the early steps in information processing are completed.
- 11. Getting information back out of memory is termed \_\_\_\_\_.

**Down**

- 1. \_\_\_\_\_ involves the manner in which information is represented and kept in memory.

- 3. \_\_\_\_\_ memory is the active processes and structures involved in holding information in mind and simultaneously using that information
- 4. A grocery list is an example of what type of memory aid?
- 5. \_\_\_\_\_ memory is a brief and almost identical representation of the stimuli that exists in the observable environment
- 8. \_\_\_\_\_ memory is intentional and conscious remembering of information learned and remembered at a specific point in time
- 10. The \_\_\_\_\_ effect demonstrates the interference that automatic processing of words has on the more effortful task of naming the colors
