

Chapter 9 Vocabulary

Across

- 1. Sperm and egg cells join
- 3. The study of heredity
- 7. A trait will always exhibit that form of the trait
- 13. A segment of DNA containing a single trait
- 14. An offspring with different traits
- 15. A trait that will exhibit the form only when the dominant allele for that trait is not present

- 16. A specific characteristic that varies from one individual to another
- 17. The likelihood that a particular event will occur
- 18. An organism's physical characteristic

Down

- 2. Organisms that have two of the same alleles for a particular trait
- 4. Sex cells
- 5. A diagram determining the gene combinations that might result from a genetic cross

- 6. An organism's genetic makeup
- 8. Organisms that two different alleles for the same trait
- 9. A type of gene
- 10. The separation of alleles
- 11. An offspring that looks exactly like its parents
- 12. The transmission of characteristics from parents to offspring
