

Name: _____

Date: _____

Chemical Changes

Across

2. Salts made from Sulphuric Acid

4. The order of metal reactivity.

5. Method of metal extraction using Carbon.

11. A chemical with a pH lower than 7.

12. OH negative ions.

13. A non-metal important to the Reactivity Series.

14. Acid found in the stomach.

16. Chemical symbol for Magnesium

18. Most reactive metal on Reactivity Series.

19. The metal with the chemical symbol Na.

Down

1. pH 7.

3. A method of metal extraction for reactive metals.

6. Carbon rods used in metal extraction.

7. Product of metal plus acid.

8. Scientific name for rock with metal inside.

9. Another word for 'in water'.

10. A metal that doesn't need to be extracted.

15. Oxidation is loss, reduction is gain.

17. The smallest particle of an element.
