

Chemical Oceanography

Across

- 4.** an electronic depth-sounding mechanism
- 8.** Substance in which another substance is dissolved
- 9.** The property of having poles or being polar
- 10.** When molecules of the same substance stick together
- 11.** Is the tendency for a fluid to resist flow

Down

- 1.** animal plankton
- 2.** Cracks allow water to seep into the crust (Heated)
- 3.** Ash from volcanic eruption and underwater volcanoes dissolving
- 5.** When water evaporates back out of the ocean, it leaves the minerals behind. The minerals make sea water salty
- 6.** Substance that is dissolved
- 7.** Attraction of water molecules
