

# Chemical reactions

## Across

3. The general name for things that react together in a chemical reaction

4. In order to make a sulphide you would need to react something with \_\_\_\_\_

6. Melting and boiling are \_\_\_\_\_ changes

8. chemical reactions are usually \_\_\_\_\_

10. The common name for hydrogen oxide

11. This may be produced in a chemical reaction

12. Physical changes are generally \_\_\_\_\_ .

13. Burning is a chemical reaction of something with \_\_\_\_\_

## Down

1. This may change in a chemical reaction

2. The general name for things that are produced in a chemical reaction

5. When metals react with chlorine you get a metal \_\_\_\_\_

7. When metals react with oxygen you get a metal \_\_\_\_\_

9. Chemical reactions can be described by word \_\_\_\_\_
