

Name: _____

Chemistry

Across

4. A state of balance in a reversible reaction.

9. The process that produces Sulphuric Acid.

10. A branch of science concerning substances of which matter is composed.

Down

1. Where both the forward and backwards reactions are possible.

2. H₂SO₄

3. A reaction that takes in heat energy.

5. A strange man.

6. A substance which speeds up the rate of a chemical reaction without being used up in the process.

7. An element with 103.0 neutrons.

8. A reaction that gives out heat energy.
