

Name: _____ Date: _____ Period: _____

Chemistry 1A

Across

- 3. Semi-conductible
- 5. Name of Group 1
- 6. The ability to conduct heat, electricity, or sound
- 8. Bendable
- 13. Brittle and non-conductive
- 16. The center of an atom
- 19. The smallest component of an element
- 22. Any particle smaller than a hydrogen atom
- 23. Synonym for shiny
- 24. The periodic table is made up of _____

26. The level of reactivity of a metal

27. Electrons on the outermost shell

Down

- 1. Name of Group 2
- 2. A group of elements with similar chemical properties
- 4. How much an atom weighs
- 7. A property of a substance during a reaction that changes the chemical composition of identity of the substance
- 9. Name of Group 18

10. The distance from the nucleus to the outermost shell

11. The attraction between opposite forces

12. Protons

14. Conductive and malleable

15. The number of protons in a nucleus

17. Name of Group 17

18. When two or more chemical elements are chemically bonded together

20. Neutral charge

21. Negative charge

25. Fragile or frail
