

Chemistry

Across

3. What is a substance that can't be broken down into simpler substance & are primary constituents of matter called

6. what is the amount of matter in an object called

7. what has a negative charge & and almost no mass

9. what is a particle smaller than an atom

10. what is something that has mass & takes up space called

Down

1. pro tons and neutron have a mass of one what

2. What are electrons found orbiting

4. what is the branch of science that deals with the identification of which matter is composed

5. what has a positive charge and exists in the nucleus of an atom

8. What has no charge and exists in the nucleus

11. what is the basic unit of a chemical element called
