

Name: _____

Date: _____

Chemistry Review

Across

2. the ending substances in a chemical reaction

5. a reaction when the temperature rises

9. The Law of _____ of Mass

11. a chemical reaction in which the temperature drops

12. a reaction that is isolated from its environment

13. a reaction that can interact with its environment

14. the starting substances in a chemical reaction

15. two compounds react to form two new compounds

16. when a substance interacts with another in the presence of energy and a different substance is produced

Down

1. when a substance changes state

3. when two or more elements are bonded together

4. the chemical symbol CO₂ represents

6. when a substance breaks down chemically

7. two different substance produce a new substance

8. one element replaces another

10. a substance's mass will _____ after a chemical reaction
