

# Chemistry

## Across

**2.** Equipment used while heating the evaporating Basin

**6.** This only contains atoms

**9.** Used to separate liquids mixed together

**10.** Contains different atoms which don't mix

**11.** Solid and liquid dissolves together to form a mixture

**12.** Liquid used for dissolving

## Down

**1.** Used for a soluble solid in a liquid

**3.** An increases in temperature after a reaction

**4.** Contains two different atoms

**5.** An insoluble solid that emerges from a liquid solution

**7.** A solid which dissolves

**8.** An example of a compound/liquid
