

Circles

Across

- 4.** an arc whose endpoints are the endpoints of a diameter. It has a measure of 180
5. the point is the point
8. A line that intersects a circle in two points
9. a measure that is less than 180
10. A segment whose endpoints are 2 points on a circle.

11. the given point, what the circle is named by

13. A line that intersects a circle in exactly one point

14. An angle whose vertex is a point on a circle and whose sides contain chords.

15. a measure that is greater than 180

Down

1. A chord that passes through the center of a Circle.

2. An angle whose vertex is the center of a circle

3. the area around a circle

6. The set of all points in a plane that are equidistant from a fixed point called the center.

7. The part of the circle created by the central angle

12. A segment whose endpoints are the center of a circle and a point on the circle.
