

Name: _____

Date: _____

Circles Vocabulary

Across

4. a part of a circle's circumference

6. the distance from the center to the circle

8. circles that have the same center

12. the distance all the way around the circle

13. an angle whose vertex is at the center of the circle

14. a line or segment that intersects the circle at only one point

15. one-half of a circle

16. a chord that contains the center of the circle

Down

1. an arc that is smaller than a semicircle

2. circles that have radii that are the same length

3. an arc that is larger than a semicircle

5. a section of the circle bounded by a central angle and the arc it subtends

7. an angle whose vertex is on the circle

9. the set of all points equidistant from a given point called the center

10. the ratio of the circumference of a circle to its diameter

11. a line that contains a chord
