

Name: _____

Date: _____

Circles Vocabulary

Across

- 2.** a portion of the line that doesn't stop on the circle.
3. a ring shaped object bound by two concentric circles.
8. one dimensional of locus points that form half of a circle.
9. any angle where the vertex of the angle is the center point of the circle.
10. a smaller arc that is less than half of the circumference.

- 12.** a line that touches a circle at just one point. concentric circles, a circle with multiple circles in it with all of them having the same center point.
14. straight line segment whose end points both lie on the circle.
15. an arc of the circle greater than or equal to the half circle.

Down

- 1.** the distance around the circle.

- 4.** any straight line segment that passes through the center and connects on the circle.
5. a point that is not in the boundary of the circle.
6. the given point from which all points are the same distance.
7. mathematical constant the ratio of a circle's circumference to its diameter commonly approximated as 3.14159.
11. a line segment from its center to its perimeter
13. a portion of the circumference of circle.
