Name: _____   Date: _____

Class 3 Physics, Term 1!

Across

5. A result that is very different from the other measurements in a data set.

6. Close to the true value of what you are measuring.

7. This is equal to distance over time.

8. An average of a set of data, found by adding together all the values in the set and dividing by the number of values in the set.

9. This is a type of error.

10. This is equal to spread over 2.

12. This is a type of variable.

13. Speeding up...

Down

1. A straight line on a distance-time graph indicates _____ speed.

2. This describes a set of repeat measurements that are close together.

3. Slowing down...

4. This feature of a distance-time graph will give the speed.

11. This is a unit of distance.
