

# Classification, Plant and Cellular Energy

**Across**

- 1. what is the organelle responsible for photosynthesis?
- 3. What is the true catalyst for photosynthesis?
- 7. which domain contains the kingdom Animalia?
- 9. \_\_\_\_\_ is the organelle responsible for cellular respiration
- 12. \_\_\_\_\_ occurs in the leaves of a plant
- 14. Which type of respiration requires no oxygen?

15. \_\_\_\_\_ is a gasous reactant of photosynthesis

**Down**

- 2. The grouping of information or objects based on similarities is called?
- 4. when it comes to food, what are plants known to be?
- 5. \_\_\_\_\_ is the most specific category of classification
- 6. Plants, animals, protist, and \_\_\_\_\_ can all preform cellular respiration

8. Fungi uses \_\_\_\_\_ to reproduce

- 10. Which kingdom that asexually reproduce contains cellulose in their cell wall?
- 11. Cellular respiration occurs in what types of organisms?
- 13. The purpose of Cellular respiration is to break down \_\_\_\_\_
