

Name: _____

Date: _____

Classification Vocab

Across

- 5. Controlled by multiple genes
- 6. Nucleic acid present in a living cell
- 7. Decodes messages in DNA
- 12. The haploid chromosomes
- 13. Nucleotide triplets
- 14. Present in DNA and RNA
- 16. Carries all genetic information
- 17. Addition of nucleotides
- 19. To make an artificial/natural copy

- 20. Carries all genetic information

- 21. Enzymes that bind nucleic acid
- 22. Nucleotides that aren't divisible by 3
- 23. Exchange one base for another

Down

- 1. Builds a new strand of DNA
- 2. Genetically engineered organisms
- 3. Missing chromosomes during replication

- 4. Ribosomes synthesize proteins

- 8. Genetic information is coded in DNA
- 9. Transfers to ribosomes
- 10. The rearrangement of genes
- 11. Consists of protein RNA and DNA
- 15. Sequence of three nucleotides
- 18. First step of DNA expression
