

Climate Change

Across

4. Energy given off from the sun
 5. The forming of towns and cities
 6. When large amounts of water covers an area and does not drain
 7. When the usual weather patterns begin to change
 11. Cleanliness or hygiene
 12. Trying to slow down or stop climate change

14. The destruction of forested areas

15. Using again, giving new life

16. When soil is loosened or washed away

17. Dead, no longer in existence

Down

1. The increase amount of greenhouse gases being trapped

2. The amount of carbon dioxide released into the atmosphere as a result of the activities of a particular individual
 3. Gases needed for life on earth

8. Learning to cope with the effects of climate change

9. Finished, used up

10. Any form of impurity in the natural environment

13. Living organisms and their environments
