

Climate Change

Across

5. Areas that appear dark on the surface of the sun
7. Layer in the atmosphere where the most weather activity occurs
8. Factors that alter or effect the Earth's climate
9. The day-to-day condition of the atmosphere and the area it covers
10. Average weather in a place over a long period of time

Down

1. Layer in the atmosphere that contains the ozone
2. Gases in Earth's atmosphere that trap heat
3. Another word for a man-made forcing
4. Fuel formed by natural forces like fossilization and decomposition
6. Released during a volcanic eruption
