

Coasts Recap

Across

- 2. Type of wave with a tall wave height
- 4. Erosion due to the scraping of rocks
- 8. Break down and removal of material
- 11. When waves lose energy, they their load
- 12. Headlands and ...?
- 14. Rock that is more resistant to erosion

15. Waves get their energy from...?

- 16. Distance a wave has travelled
- 17. The breakdown of rock in situ
- 18. Type of landscape at which the land meets the sea

Down

- 1. breakdown of rock through freezing
- 3. Rock that is more likely to erode

5. Transportation along the coast

- 6. A wave with a stronger swash than backwash
- 7. Erosion due to the shear force of the water
- 9. A coastline where bands or rock are at a right angle to the coast
- 10. Movement of material downhill due to gravity
- 13. Eventually a stack will become a?
