

Name: \_\_\_\_\_ Date: \_\_\_\_\_

# Coding Revision - Year 8

## Across

5. A common programming error
7. A set of rules or a process that is followed to solve a problem is known as an \_\_\_\_\_
8. The process of focusing on what is important and leaving out what is not important
9. A programming construct in which a decision is made based on whether a condition is met
10. In coding a \_\_\_\_\_ is the name of a piece of data that can change

## Down

1. The process of taking a complex problem and breaking it down into smaller pieces
2. A method that can be used to check how an algorithm works to ensure there are no logic errors
3. A computer based program often used in programming
4. A programming construct in which there is a repetition of a process is known as
6. \_\_\_\_\_ can be used in program design to aid understanding. It is a visual representation of a piece of code
