# Conductors and Insulators

## Across

4. The simplest form of matter  
 7. Neutral  
 9. Electrons flow easily between atoms  
 10. Electrons are removed by rubbing \_\_\_\_\_ surfaces together.  
 11. Is Sulfur a conductor or insulator?

## Down

1. Smallest piece of an element containing all of the properties of that element  
 2. Electron flow is difficult between atoms  
 3. Electricity is created as electrons collide and transfer from atom to atom.  
 5. Positive Charge  
 6. Electricity is the movement of...  
 8. Negative Charge
