$\qquad$

## Congruent Triangle Proof Vocabulary

Across
9. Divides a segment or angle into two equal parts
10. Figures that have the same size, shape, and angle measure
11. An angle that measures exactly 90 degrees
12. Two angles whose sum is 180 degrees

Down

1. Two angles that
share a common vertex and a side
2. Sharing a common
side or angles between to figures
3. two angles whose sum is 90 degrees
4. Opposite and
congruent angles formed by intersecting lines
5. Two angles in a triangle are congruent 6. Lines that intersect and form right angles 7. Divides a segment into 2 congruent segments
6. Perpendicular line to the base, forming right angles
