

Name: _____

Date: _____

Crossward Puzzle

Across

- 1. lines, segments, or rays that form right angles
- 3. two angles with measures that have a sum of 90
- 7. a point that's halfway between endpoints of a segment
- 11. 2 segments that are congruent
- 13. a pair of adjacent angles with noncommon sides that are opposite rays
- 15. it's a location/a dot

- 18. points that lie on the same plane
 - 19. 2 geometric figures that have exactly the same shape and size
 - 20. 2 angles that lie in the same plane and have a common vertex and a common side
- Down**
- 2. common endpoint
 - 4. 2 nonadjacent angles formed by 2 intersecting lines
 - 5. formed by two noncollinear rays that have a common endpoint

- 6. flat surface made up of points that extends infinitely in all directions
- 8. made up of points and has no thickness or width
- 9. outside
- 10. points that lie on the same
- 12. ray
- 14. inside
- 16. side of an angle
- 17. a unit that is used to measure angles

Word Bank

- | | | | |
|---------------|-----------------|----------------------|-----------------|
| perpendicular | congruent | vertex | line |
| ray | vertical angles | complementary angles | collinear |
| midpoint | sides | congruent segments | adjacent angles |
| angle | interior | plane | point |
| degree | exterior | coplanar | linear pair |
