

Cycles

Across

- 10. the waters system
- 11. atomic number 15
- 12. the upper atmosphere
- 13. includes oxygen, methane, CO2 and ozone
- 14. the is the life support system of our planet.
- 15. atomic number 7
- 17. burning of fuels result in higher greenhouse emissions
- 18. these atoms destroy ozone molecules

19. the prevents UV radiation reaching earths surface.

20. travels form non-living things to living things

Down

- 1. cooling agents in refrigerators and Air conditioners
- 2. global warming is caused by
- 3. human activity has led to and greenhouse emissions.
- 4. reacts with water vapor to form nitric acid.
- 5. the lowest atmosphere.

6. includes humus in soil, rocks, coal and oil.

7. the uppermost layer of the atmosphere (500km and up)

8. increased human has led to an increase in burning of fossil fuels.

9. All living things belong in this sphere

16. environmental factors influence in certain biomes
