

Name: _____ Date: _____ Period: _____

DNA

Across

4. _____ proposed base pairing rules
8. A molecule made of subunits called nucleotides arranged as a
9. What are the base pairing rules called
11. NUCLEIC ACIDS are built from subunits called
12. _____ are single ring bases

13. Telomeres protect the ends of _____
14. What is linear DNA
15. What is the third part of Nucleotides

Down

1. _____ Bonds between nitrogen bases hold the two strands together
2. _____ are double ring bases.

3. What has a double helix?
5. What two people discovered the double helix
6. What is circular DNA called
7. What genetic material codes for specific trait
10. DNA is usually in the form of
