DNA

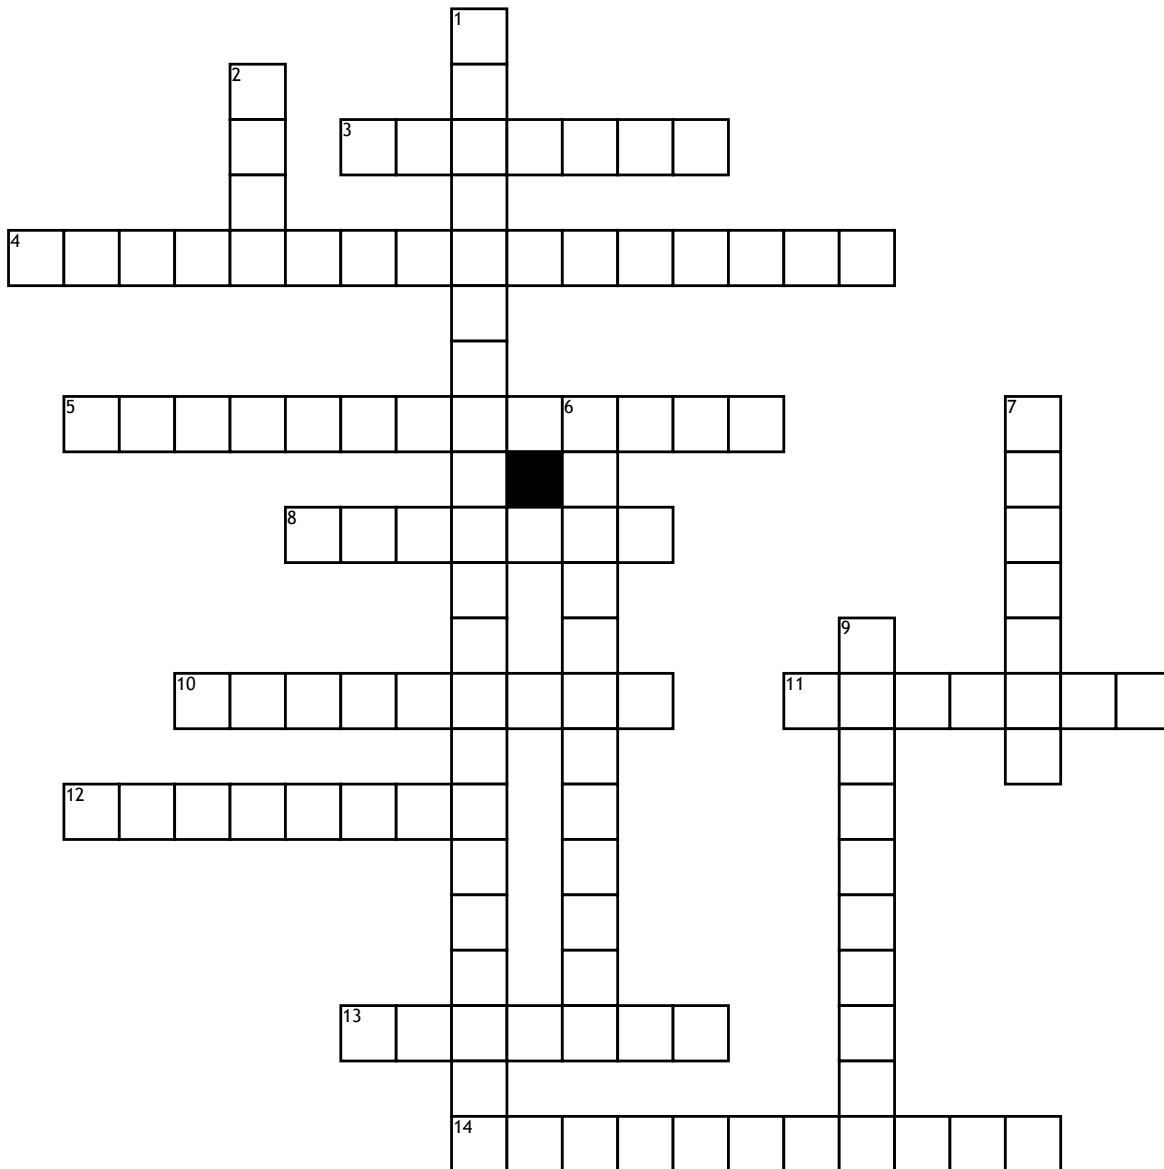

Across

3. The production of identical offspring by asexual reproduction

4. What is the process of making proteins?

5. How do bacteria divide?

8. What type of cell division is genetically identical?

10. What is the male reproductive cell?

11. Which base does Adenine bind to?

12. What holds the mRNA in the cytoplasm?

13. Where is DNA held?

14. What shape is DNA formed in?

Down

1. What does DNA stand for?

2. A section of DNA that codes for a protein

6. What pulls the chromosomes apart in mitosis?

7. What makes reproductive cells?

9. A thread like structure of nucleic acids
