

# Data and graphs

## **Across**

- 2.** It is a variation that is distributed in separate categories
- 3.** It is a variation that is distributed along a continuum rather than in categories
- 7.** it is how well sets of data are linked
- 8.** It is a chart that represents grouped data
- 9.** a diagram showing the relationship between different variables

- 10.** one variable increases as the other decreases what correlation is this?

## **Down**

- 1.** It displays blues for 2 or more sets of data
- 4.** What correlation has a relationship between two variables where 2 variables both increase
- 5.** It is facts and statistics collected together
- 6.** It is used to plot the frequency of score occurrences in continuous data
