

Density

Across

4. What takes up a definite amount of space but do not have a definite shape?
6. The measurement of how much mass fits in a certain volume, (M/V)
8. The measurement of the amount of matter.
10. Substances that are more dense than water will

Down

1. the label for mass
2. The amount of space matter makes up
3. A substance with less density than water will
5. What does not take up a definite amount of space and have no definite shape?
7. used to measure mass
9. What has a definite shape and occupy a definite amount of space?
