

Dental Anatomy Terms!

Across

2. What is the space between the proximal surfaces?
5. What is the junction of three crown surfaces?
6. What are the spaces from curvatures where two teeth in the same arch contact?
8. What is another name of the facial surface of a tooth on the posterior teeth?
10. What is the mesial and distal tooth surfaces that face each other?
12. What is the tooth surface towards the face?
14. What is the tooth surface towards the midline?
16. What is it when occlusal cusp of one tooth touches the occlusal portion of opposing tooth?
18. What are the teeth in the front of the dental arch called?

19. What is the name for the division of the dental arch into 3 parts based on relationship to midline?

20. What is the junction of two crown surfaces?
22. What is the bone underlying the lower lip or the lower jaw?
24. What is the bone that surrounds and supports each individual tooth socket?
25. What is the area of the mesial and distal surfaces that touch each other?
26. What is the part of the maxilla/mandible that supports and protects the teeth?
27. Number system that uses a symbol with the number placed inside?

Down

1. Numbering system that uses two digit code, first number is quad, second is the tooth's position in quad?

3. Numbering system using #1-32 and A-T?

4. What is the tooth surface towards the tongue on the MAXILLARY ARCH?
7. What fills in the space in the interproximal space?
9. What are the teeth in the back of the dental arch called?
11. What is the surface away from the midline?
13. What are hard bony growths on the maxilla/mandible alveolar ridge?
15. What is the bone underlying the upper lip or upper jaw?
17. What is the curving structure formed by the teeth while in their normal position?
21. What is the tooth surface towards the tongue?
23. What is another name of the facial surface of a tooth on the anterior teeth?
