Diagnosis and Symptom Management

Across

- **4.** feelings of severe despondency and dejection
- **6.** unwanted repetitive behavior patterns or mental acts (eg praying, counting, repeating words silently) that are intended to reduce anxiety, not to provide pleasure or gratification
- **9.** deep sorrow, especially that caused by someone's death
- **11.** knowing when feelings are present in ourselves and others.
- **12.** belief continues in spite of obvious proof that it is false and/or irrational
- 13. something that sets off a memory tape or flashback transporting the person back to the event of her/his original trauma

- **14.** extreme suspiciousness
- 15. an irrational fear
- **16.** unwanted, intrusive, persistent ideas, thoughts, impulses or images that cause marked anxiety or distress
- **17.** a mental disorder marked by alternating periods of elation and depression.
- **18.** legal drug capable of affecting the mind, emotions, and behavior.

Down

- 1. a severe mental condition in which there is disorganization of the personality, deterioration in social functioning, and loss of contact with, or distortion of, reality
- 2. false sensory perceptions not associated with real external stimuli; may involve any of the five senses

- 3. mental disorder in which a person experiences a combination of schizophrenia symptoms, such as hallucinations or delusions, and mood disorder symptoms, such as depression or mania
- 5. enables a person to act in his own best interests, to stand up for himself without undue anxiety, to express his honest feeling comfortably, or to exercise his own rights without denying the rights of others.
- **7.** periods of great excitement, euphoria, delusions, and overactivity.
- 8. chronic and severe mental disorder that affects how a person thinks, feels, and behaves
- 10. a deep understanding of a person or thing
