# Diamond Midterm Exam 2

Across

1. is a portion of a line that includes two points and all of the collinear points between the two points

7. a four-sided plane rectilinear figure with opposite sides parallel

11. a circle is a line segment with one endpoint on the circle and one endpoint at the center

12. is a formed by two rays that share a common endpoint

13. a plane figure with four straight sides and four right angles

15. a plane figure with three straight sides and three angles

16. a part of a figure cut off by a line or plane intersecting it

17. a plane figure with four equal straight sides and four right angles

18. each angular point of a polygon, polyhedron, or other figure

19. a plane figure with at least three straight sides and angles, and typically five or more

20. two lines that are always the same distance apart and never touch

Down

2. a parallelogram with opposite equal acute angles, opposite equal obtuse angles, and four equal sides

3. only has one pair of parallel sides

4. a four-sided figure.

5. identical in form

6. an angle of 180°

8. is a triangle with all three angles acute

9. is a portion of a line that begins with a single point and extends infinitely in one direction

10. Is straight and has only one dimension

14. a unit of linear measurement of magnifying power
