Different Mental Disorders

Across

2. A mental disorder marked by alternating periods of elation and depression.
 8. An anxiety disorder in which an individual experiences excessive anxiety regarding separation from home or from people to whom the individual has a strong emotional attachment
 13. A recurrent urge to steal, typically without regard for need or profit.
 15. A developmental disorder characterized by significant difficulties in social interaction and nonverbal communication.
 16. Defined as part of a spectrum of tic disorders, which includes provisional, transient and persistent (chronic) tics.
 17. An extreme or irrational fear or dislike of a specified thing or group.

19. It is the most commonly diagnosed mental disorder of children. Children with this may be hyperactive and unable control their impulses, or they may have trouble paying attention.
 20. A neurological disorder marked by sudden recurrent episodes of sensory disturbance, loss of consciousness, or convulsions, associated with abnormal electrical activity in the brain.

Down

1. A disorder characterized by abnormal or unusual behavior of the nervous system during sleep.
 3. A feeling of worry, nervousness, or unease
 4. It is a chronic and severe mental disorder that affects how a person thinks, feels, and behaves.
 5. A partial or total loss of memory.
 6. A condition characterized by an extreme tendency to fall asleep whenever in relaxing surroundings.
 7. Feelings of severe despondency and dejection.

9. Progressive mental deterioration that can occur in middle or old age, due to generalized degeneration of the brain.

10. It is a mental health condition that's triggered by a terrifying event — either experiencing it or witnessing it.
 11. The inability to sleep.
 12. A chronic or persistent disorder of the mental processes caused by brain disease or injury and marked by memory disorders, personality changes, and impaired reasoning.
 14. A mental condition, present from early childhood, characterized by difficulty in communicating and forming relationships with other people and in using language and abstract concepts.
 18. A mental disorder in which people have unwanted and repeated thoughts, feelings, ideas, sensations, and behaviors that drive them to do something over and over.
