

Different Types Of Energy

Across

- 2. radiation matter capable to perform work
- 8. a natural substance that creates an energy surface
- 10. the result of affected tides
- 11. facts and statistics collected together for reference or analysis
- 12. the point where something begins

- 14. a fuel derived directly from living matter
- 15. natural resources that creates electricity

Down

- 1. heat energy generated and stored in the earth
- 3. energy released during nuclear fission or fussion when used to generate electricity

- 4. ability to maintain a certain level
- 5. cannot be renewed
- 6. process of disturbing something
- 7. can be renewed
- 9. radiant energy controlled by the sun
- 13. the process by which wind is used to generate electricity
