

Name: _____

Date: _____

Digestion and absorbtion of proteins

Across

- 3.** What microorganism is located in the linings of the epithelial cells
- 7.** These break peptide bonds in the middle of a protein molecule
- 8.** What does the digestion of proteins produce
- 9.** What mechanism is used for the absorbtion of digestive products
- 10.** What is a digestive enzyme located in the stomach

Down

- 1.** When Testing for proteins , the colour changes when posotive is blue to what
- 2.** what Process occurs to join multiple monomers together to foram an amino acid
- 4.** Which enzymes causes proteins to turn into amino acids
- 5.** What reaction occurs when breaking down protein molecules
- 6.** What type of enzyme are present in the cell membrane of the ileum
