# Digestive Medical Terminology

## Across

1. It can prevent the buildup of cystine crystals in the kidneys in its oral form. Other forms can treat cystine crystal buildup in the eye (cystinosis).
10. a disease characterized by inflammation of the liver.
12. The study of the tongue and its diseases.
13. chew (food).
14. inflammation of the gums.
15. inflammation of the stomach and intestines, typically resulting from bacterial toxins or viral infection and causing vomiting and diarrhea.

## Down

2. a chronic disease of the liver marked by degeneration of cells, inflammation, and fibrous thickening of tissue. It is typically a result of alcoholism or hepatitis.
3. a surgical operation in which a piece of the colon is diverted to an artificial opening in the abdominal wall so as to bypass a damaged part of the colon.
4. surgical anastomosis between two segments of the intestine.
5. a branch of the mandibular division of the trigeminal nerve (CN V3), which supplies sensory innervation to the anterior 2/3 of the tongue.

6. inflammation in the gallbladder
7. relating to the teeth.
8. A qualitative test for hidden blood in the stool, based upon detecting the peroxidase activity of hemoglobin.
9. the internal organ in which the major part of the digestion of food occurs, being (in humans and many mammals) a pear-shaped enlargement of the alimentary canal linking the esophagus to the small intestine.
11. an ache localized in or around a tooth.
