

# Disease Set 1

**Across**

- 2. a cell that has a nucleus; more complex
- 4. drugs that can treat people who have already been infected by a virus
- 7. spiral-shaped
- 9. an organism that carries pathogens from one person or animal to another
- 11. spherical
- 13. spore-producing organism that feeds on organic matter

- 14. one-celled organisms without a nucleus
- 15. a cell that does not have a nucleus; very simple

**Down**

- 1. rod-like
- 3. medicines that interfere with the reproduction of bacteria; are not effective against viruses
- 5. the study of microscopic living organisms

- 6. a living thing or virus that causes disease; commonly called germs
- 8. non-living; must reproduce within living cells
- 10. an organism that lives in or on another organism (host) and harms the host in some way
- 12. can only be used to prevent infections (viral and bacterial) from leading to disease
