

Dunn Crossword

Across

2. The relationship of the sides and angles of a triangle
 3. The angle within a circle that is used for radian measuring
 6. A trigonometric ratio of opposite/hypotenuse
 7. Ratios of any two sides of a right triangle
 10. A triangle with two sides of the same length and one with a right angle
 11. A trigonometric ratio that is the reciprocal of the sine
 12. The non-hypotenuse two sides of the triangle

14. A part of the interior of a circle bounded by two radii
 15. Any triangle with two sides of the same length
 16. A trigonometric ratio that is the reciprocal of the tangent
 17. A line which the graph approaches but never reaches
 19. A downward angle from the horizontal
 20. The leg across from the angle θ

Down

1. Equations involving trigonometric functions of an angle θ are true for any value of θ

4. The leg next to the angle θ
 5. The side opposite the right angle
 8. The angle between the terminal side of an angle and the x-axis
 9. A trigonometric ratio that is the reciprocal of the cosine
 13. A trigonometric ratio of adjacent/hypotenuse
 18. A trigonometric ratio of opposite/adjacent
