

# ED Terms

## Across

1. Classification of infusion, injections and hydration according to importance or inclusiveness
5. Surgical puncture of a cavity with a needle for diagnostic or therapeutic aspiration of fluid
6. The therapeutic introduction of a fluid other than blood, such as saline, into a vein
7. Removal by suction, usually by needle, of excess fluid from a body cavity
8. Puncture and aspiration of a joint
9. Infusion consisting of pre-packaged fluid and electrolytes but note other drugs or substances
10. Introduction of whole blood or blood components directly into the bloodstream

11. The formation of an opening into the bladder, such as for urinary diversion. Also called vesicotomy or suprapubic catheter

## Down

2. Primary service during the encounter irrespective of the order in which the infusion or injections are administered
3. Infusion of a new substance or drug infused at the same time as another substance or drug. Not time based and may only be reported once a day regardless of whether a new substance or drug is administered during that time
4. An infusion or IV push or a new substance or drug following an initial service
