

Name: _____ Date: _____ Period: _____

EKG Medical Terms QUIZ

1. _____ Stress Test; Evaluates Cardiopulmonary Function
 2. _____ a bluish discoloration of the skin
 3. _____ the record of an EKG
 4. _____ the machine that takes the EKG
 5. _____ study of the heart
 6. _____ transmission of cardiac signals to a receiving or central location where they are displayed for monitoring
 7. _____ under or beneath the tongue
 8. _____ hospital acquired infections
 9. _____ used for airborne precautions
 10. _____ waves that travel and seen vertically in an EKG
 11. _____ waves that travel and seen horizontally in an EKG
 12. _____ deficient supply of blood to a body part due to obstruction of the inflow of arterial blood
 13. _____ electrocardiogram trace in which the QRS axis of the heart in the frontal plane lies outside the usual range; represents an abnormal direction of ventricular depolarization
 14. _____ an equilateral triangle that is used as a model of standard limb lead used to record electrocardiogram
 15. _____ "V" or chest leads
 16. _____ Backwards or Mirror Heart, apex of the heart is on the right side
 17. _____ the return of the ions to their previous resting state, corresponds with relaxation of the myocardial muscle
 18. _____ the drive that causes the contraction of the cardiac cells and muscles as a wave through the heart
 19. _____ line between two waves
- A. Sublingual
 - B. N-95 Respirator
 - C. Dextrocardiac
 - D. Duration
 - E. Nosocomial
 - F. Einthoven Triangle
 - G. Telemetry
 - H. Cyanosis
 - I. Cardiology
 - J. Segment
 - K. J Point
 - L. Exercise Tolerance Test
 - M. Electrocardiogram
 - N. Ischemia
 - O. Electrocardiograph
 - P. Amplitude
 - Q. Axis Deviation
 - R. Repolarization
 - S. Depolarization

20. _____ the junction between the termination of the QRS complex and the beginning of the ST segment

T. Preordial Leads
