## ENVIRONMENTAL STUDIES (CS2007D) Midterm

## Across

- 2. Natural Resources such as rivers, lakes, glaciers, and groundwater are called 7. The bulk of our food production depends on this natural resource
- **9.** This fossil fuel is in the form of a rock
- **10.** Rocks from which minerals or metals can be extracted for profit.
- **14.** The process that converts nitrogen in the atmosphere into compounds in the soil that are useful to a varity of organisms
- **15.** A living part of an ecosystem
- 17. The practice of growing crops and livestock to produce food, fibre, and fuel is called
- **18.** An organism in a food web or food chain that makes its own food

- **19.** The process of turning raw materials into finished products in a factory
- **20.** Green Revolution in India was initiated by

## **Down**

- 1. The process in which fixed nitrogen compounds are converted back into nitrogen gas and returned to the atmosphere
- **3.** A relationship between two species in which one species benefits and the other is neither helped or harmed
- **4.** Resources that cannot be replaced are called
- **5.** Electricity produced by harnessing the energy of flowing water is known as
- **6.** A process by which plants use the sun's energy to make food
- **8.** This fossil fuel is in the form of a gas

- 11. The process of extracting valuable metals and minerals from the earth's crust is called
- **12.** Which one is Renewable: Natural Gas or Solar Energy?
- **13.** This fossil fuel is in the form of a liquid
- **16.** Leader of 'Narmada Bachao Andolan'
