

EVS

Across

- 4. One of the components of ecosystems
- 8. What is by far the most important biotic factor
- 9. One gram of dry biomass is equal to one
- 13. One of the linkages in a ecosystem
- 15. What decreases at higher trophic levels
- 16. Bacteria and fungi are
- 18. Trophic level means a
- 19. One of the main principles of ecosystem

20. Principle of holocoentic environment was suggested by Down

- 1. What is the particular energy movement and pathway of nutrients
- 2. Which components form the ecosystem and determine the type of ecosystem
- 3. Producers are also called as?
- 5. Which trophic level has the highest no. of organisms
- 6. What restricts ecosystem development

7. A very important factor affecting the organisms

- 10. What is a source of energy for a ecosystem

11. What can cause mechanical damage to plants

- 12. Nitrogen cycle can be affected by man in how many ways

14. Topography can influence ecosystem in how many ways

- 17. Herbivores, carnivores and omnivores are
